SUMMARY

Motivated MERN Stack Developer with strong foundations in MongoDB, Express, React, and Node.js. Experienced in delivering responsive full-stack applications, RESTful APIs, and real client projects with clean state management.

PROJECT

RestoPOS – Restaurant Point-of-Sale System

- Designed and implemented a **35-permission role-based access control (RBAC)** system with backend authorization, enabling secure access across **Admin and Staff** modules.
- Built a real-time inventory management system using **Socket.IO/WebSockets**, providing instant stock synchronization across multiple active POS sessions and preventing overselling.
- Developed offline order queuing and table reservation functionality, allowing uninterrupted restaurant operations during network outages and automatic order synchronization upon reconnection.
- Integrated **Cloudinary** for secure image storage and optimization, managing restaurant logos and menu item images through automated upload and retrieval workflows.
- Implemented a centralized audit logging system that tracks user authentication, CRUD operations, and administrative actions to improve security, traceability, and compliance.
- Architected a reporting dashboard with date-range filtering, CSV export, and sales analytics, enabling managers to monitor revenue, orders, inventory, and operational performance from a single interface.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Khwaja Fareed University of Engineering & Information Technology (KFUEIT) • Rahim Yar Khan, Punjab • 2028
• Currently Enrolled.

CERTIFICATIONS

Internship Certification

Appverse Technologies • 2026

Web Development Training

Promoteez International IT Training Institute • 2024

SKILLS

Frontend Dev: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive UI Architectures

Backend Dev: Node.js, Express.js, RESTful API Design, Authentication & Authorization

Database: MongoDB, Mongoose, Schema Design

Tools & Tech: Git, GitHub, Postman, Visual Studio Code, Chrome Developer Tools, Vite, Vercel, GitHub Pages Hosting

Soft Skills: Analytical Problem Solving, High-Velocity Adaptability, Structured Communication, Cross-Team Collaboration, Fast Learning

Languages: English: Intermediate (B1/B2), Urdu: Native / Full Proficiency
