CAREER OBJECTIVE

Motivated and self-taught MERN Stack Developer with strong foundations in MongoDB, Express.js, React.js, and Node.js, alongside solid command of HTML5, CSS3, and JavaScript (ES6+). Passionate about building responsive, dynamic, full-stack web applications with clean state management and well-structured APIs. Quick learner with a strong problem-solving mindset, attention to technical detail, and proven experience delivering real client projects end to end. Available for remote and on-site opportunities to contribute to real-world development teams.

TECHNICAL SKILLS

Frontend Dev: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive UI Architectures

Backend Dev: Node.js, Express.js, RESTful API Design, Authentication & Authorization

Database: MongoDB, Mongoose, Schema Design

Tools & Tech: Git, GitHub, Postman, Visual Studio Code, Chrome Developer Tools, Vite, Vercel, GitHub Pages Hosting

Soft Skills: Analytical Problem Solving, High-Velocity Adaptability, Structured Communication, Cross-Team Collaboration, Fast Learning

FEATURED CLIENT WORK

RestoPOS – Restaurant Point-of-Sale System

MongoDB, Express.js, React, Node.js (MERN)

- Built and deployed a full restaurant point-of-sale system for a real client, covering order management, billing, and menu/inventory tracking.
- Designed and implemented RESTful APIs with Express.js and Node.js, backed by a MongoDB database for persistent, structured data storage.
- Developed a responsive React front end enabling staff to create orders, process payments, and track sales in real time.

CryptoTool – Crypto Analytics Dashboard

React, Tailwind CSS, Data Visualization, Public APIs

- Delivered a crypto analytics dashboard as a frontend client project, visualizing live market data and price trends.
- Implemented dynamic, interactive charts and a responsive UI for tracking cryptocurrency prices and performance metrics.
- Integrated third-party crypto market APIs with efficient async data fetching and clean client-side error handling.

TECHNICAL PROJECTS

AI Interview Preparation Application

React, Tailwind CSS, Vite, Claude AI API

- Engineered an AI-powered interview preparation application that generates real interview questions based on selected topic and difficulty level.
- Uses Claude AI API to evaluate answers and provide detailed feedback with structured scoring metrics.

GitHub Finder Application

JavaScript (ES6+), Tailwind CSS, GitHub API

- Engineered a search application that interfaces with the third-party GitHub REST API to fetch live user metrics and repositories.
- Implements structured asynchronous data fetching (async/await) paired with smooth client-side error handling.

Task Management App

JavaScript (ES6+), LocalStorage, HTML5/CSS3

- Built a productivity application featuring full CRUD actions (create, edit, toggle, delete) and real-time state persistence.
- Implemented client-side LocalStorage integration to securely preserve all user data across browser refreshes.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science (BSCS)

Expected Graduation: 2028

Khwaja Fareed University of Engineering & Information Technology (KFUEIT) • Currently Enrolled

Web Development Training — Promoteez International IT Training Institute

2024

Internship Certification — Appverse Technologies

LANGUAGES

English: Intermediate (B1/B2) • **Urdu:** Native / Full Proficiency
